EDUCATION

University of Illinois Urbana-Champaign Aug 2022 - May 2026
B.S. in Computer Engineering, Minor in Data Science
Study abroad at Nanyang Technological University, Singapore

EXPERIENCE

LLM Linguistic Resource Researcher Jan 2026 - May 2026
School of Information Sciences at UIUC Champaign, IL
- Analyzed LLM training-data scarcity across 80+ languages to investigate barriers to equitable AI development.
- Simulated NLP filtering pipelines to reveal disproportionate data loss for low-resource African languages.
- Developed a sampling method to promote equitable representation of low-resource languages in NLP.

Machine Learning and Infrastructure Engineering Intern May 2025 - Aug 2025
Blue Cross and Blue Shield of Illinois Chicago, IL
- Integrated ML into infrastructure capacity planning, reporting to the Executive Director of Infrastructure.
- Developed a multi-model seasonal forecasting system to inform proactive CPU, RAM, and storage upgrades.
- Optimized problem reporting for 2,700+ apps, improving speed 61% and coverage 37% to prevent server failure.
- Analyzed membership and distributed resource-usage trends with PySpark to inform AIOps scalability planning.

Software Engineering Intern May 2024 - Aug 2024
Mullbry, Inc. (Startup) Rochester, NY
- Collaborated with the CEO to streamline the borrower approval process through AI-assisted workflows.
- Automated borrower-analysis workflows using OpenAI function calling, reducing approval time by 30%.
- Integrated Plaid, credit reports, and self-reported data with Pandas to build accurate, equitable borrower profiles.
- Built a modular testing framework to evaluate LLM accuracy across diverse analytical scenarios.

Human-Robot Interaction Researcher Aug 2022 - Aug 2025
Human Factors and Aging Lab at UIUC Champaign, IL
- Optimized data collection and automated citation generation, reducing research turnaround time by 40%.
- Built Lasso and Ridge regression models using scikit-learn and statsmodels to estimate trust in assistive robots.
- Presented research findings for two consecutive years at the Illinois Undergraduate Research Symposium.

PROJECTS

AI-Powered Organizational Knowledge Platform May 2026 - Present
Startup (Working Prototype) Chicago, IL
- Designed and built an AI-powered platform to capture, preserve, and share implicit institutional knowledge.
- Developed RAG and LLM pipelines to surface insights from documents, conversations, and experiential expertise.
- Directed agentic AI-assisted development, guiding task decomposition, implementation, testing, and refactoring.

Tiny ML Embedded Keyword Spotting Jan 2025 - May 2025
Nanyang Technological University Singapore
- Deployed real-time audio classification on an Arduino using Keras and TensorFlow for Microcontrollers.
- Achieved 78% keyword-spotting accuracy with a quantized CNN and MFCC preprocessing within 256 KB RAM.

PUBLICATIONS

Olatunji, Tsai, **Gowrishankar**, Bayles, Rogers, Robots for Older Adults: A Scoping Review. ACM Transactions on Human-Robot Interaction, 2026. https://doi.org/10.1145/3799977

LEADERSHIP

President and Exec Advisor Jan 2024 - May 2026
Engineers Without Borders at UIUC Champaign, IL
- Led 22 chapter leaders, overseeing 170+ members, and 4 international projects with a $120K budget.
- Pioneered a membership incentive system, increasing membership by 81% and retention by 26% year over year.
- Led a chapter-wide fundraising team, increasing semesterly funds raised from $300 to $30,000 within one semester.
- Traveled to Malawi to collaborate with local experts and implement a vehicular bridge for a village of 25,000.

SKILLS

Languages: Python, C++, C, JavaScript, CUDA, RISC-V Assembly
AI/ML: OpenAI SDK, LLM Pipelines, RAG, Function Calling, TensorFlow, scikit-learn, PySpark
Tools: Claude Code, Cursor, Git, Docker, Azure DevOps, Databricks, VSCode, Jupyter, Arduino, Power BI
